MD-90-30		X

* Preliminary data for the 747-8 and 787-8.

** Early models were not delivered with fuel jettison capability although airlines could install the capability. Later models had fuel jettison capability. Consult the using airlines for their specific configuration.

*** Some aircraft originally delivered to Air Canada DC-9-10/30 series had fuel jettison capability, but it is believed that these systems were deactivated.
